PROFESSIONAL SUMMARY

Results-driven Full Stack Java Developer with 8+ years of experience designing and developing scalable enterprise applications using Java, Spring Boot, ReactJS, MySQL, and AWS. Experienced in microservices architecture, RESTful API development, cloud deployment, RBAC systems, CI/CD pipelines, and secure coding practices. Proven track record of delivering enterprise learning platforms, admin management systems, and certificate automation solutions. Active practitioner of agentic AI development using Claude Code and Playwright MCP for autonomous coding and UI test automation.

TECHNICAL SKILLS

Backend: Java 8/17/21, Spring Boot, Spring Security, Spring Data JPA, Hibernate, REST APIs, Microservices, Spring Cloud, API Gateway, System Design.

Frontend: ReactJS, TypeScript, JavaScript (ES6+), Vite, React Hooks, Context API, TanStack Query, HTML5, CSS3, Tailwind CSS, Material UI (MUI), Custom NPM library.

Databases: MySQL, MongoDB, Redis.

Cloud & DevOps: AWS (EC2, Lambda, S3, CloudWatch), Jenkins, Maven, CI/CD, Docker.

Security & Monitoring: JWT, OAuth2, SonarQube, Burp Suite, OWASP ZAP, Sentry.

Tools & Platforms: Git, GitHub, Jira, Postman, Swagger, IntelliJ IDEA, VS Code, WebStorm, DataGrip.

Testing: JUnit, API Testing, VAPT Remediation, Playwright MCP (UI Automation), Regression Test Suites.

AI Tooling: Claude Code (Agentic Coding), Playwright MCP, GitHub Copilot, Gemini.

PROFESSIONAL EXPERIENCE

Application Development Manager | [Think Talent Services Pvt Ltd](#) | Apr 2025 – Present

- Led full-stack development of 3+ enterprise products using Java 21, Spring Boot, ReactJS, and MySQL, delivering features across a team of 8+ engineers on 2-week sprint cycles.
- Managed development workflows, sprint planning, production releases, and cross-functional collaboration across multiple concurrent projects.
- Improved API response time by 35% through MySQL query optimization and JPA tuning, reducing average latency from ~800ms to ~520ms across 10+ high-traffic endpoints.
- Drove scalable microservices architecture and secure coding practices adoption across all enterprise platforms.
- Used Claude Code as an autonomous coding agent for multi-step development tasks generating Spring Boot service logic, react components, and debugging production issues across concurrent sprints, accelerating delivery velocity.

Senior Software Engineer | [Think Talent Services Pvt Ltd](#) | Apr 2020 – Mar 2025

- Architected and delivered 40+ RESTful APIs using Spring Boot, serving 5,000+ users across multi-tenant enterprise clients, with full Swagger documentation and Postman test suites.
- Designed and implemented OAuth2-based RBAC authentication system supporting 10+ client organizations with role-specific access control, reducing unauthorized access incidents to zero post-deployment.
- Optimized critical database queries and backend services, improving application throughput by 40% and reducing server load during peak usage periods.
- Remediated 15+ critical and high-severity VAPT findings using OWASP ZAP and Burp Suite, achieving zero critical security gaps in 3 consecutive audit cycles.
- Implemented Hibernate caching and transaction management strategies to improve backend performance and data consistency across microservices.

Software Engineer | [Think Talent Services Pvt Ltd](#) | Oct 2018 – Mar 2020

- Built 15+ backend modules and ReactJS UI components for an LMS platform serving 1,000+ learners, improving page load performance by 20% through frontend optimization.
- Integrated 10+ third-party APIs, enhanced UI workflows, and supported 4 major production deployments with zero rollbacks.
- Resolved 50+ defects and feature requests within SLA in Agile sprints, contributing to a 95%+ on-time delivery rate across 4 product releases.

Software Engineer Intern | [Think Talent Services Pvt Ltd](#) | Apr 2018 – Sep 2018

- Assisted in application development, API testing, and database management, contributing to 3 feature modules shipped in production.
- Gained hands-on experience with Java, Spring Boot, MySQL, and ReactJS in a live enterprise development environment.

PROJECTS

LMS 3.0: Learning Management System

Scalable enterprise LMS with user management, client onboarding, course tracking, and RBAC.

- Implemented OAuth2-based secure authentication supporting 5,000+ concurrent users across 10+ client tenants.
- Optimized MySQL query performance and backend workflows, reducing report generation time by 45%.
- Developed interactive ReactJS dashboards with real-time course tracking and progress analytics.
- **Agentic Coding with Claude Code:** Directed Claude Code to scaffold Spring Boot service modules, ReactJS components, and MySQL query optimizations cutting development cycle time across multi-tenant feature delivery.

CONNECT: Enterprise Engagement Platform

Unified platform integrating learning workflows, assessment workflows, feedback workflows, user activity tracking, and collaboration tools.

- Designed scalable microservices architecture and relational database schema supporting 3 integrated modules.
- Developed 20+ RESTful APIs and ReactJS frontend components; managed production support for 2,000+ active users.
- Leveraged Claude Code to generate REST controller stubs, ReactJS scaffolding, and database migration scripts eliminating boilerplate overhead across 3 integrated platform modules.

SYSTEM OWNER: Centralized Admin Platform

Administration platform for managing clients, users, and dynamic access permissions.

- Implemented RBAC-based user provisioning workflows supporting 50+ admin roles across multi-client environments.
- Designed backend APIs and database structures handling 10,000+ user records with sub-100ms query response.
- Applied Claude Code to generate RBAC service logic, access-control policy modules, and API scaffolding compressing delivery of 50+ admin role configurations across multi-client environments.

CMS: Certificate Management System

Automated certificate generation, verification, and LinkedIn credential sharing system.

- Built dynamic certificate template engine reducing manual issuance effort by 90% for 500+ certificates/month.
- Developed secure validation workflows with tamper-proof certificate verification and LinkedIn integration.

EDUCATION

B.Tech, Balasore College of Engineering & Technology, Balasore, Odisha – 2016

12th, Talanagar Junior College, Balasore, Odisha – 2012

10th, Bahanaga High School, Balasore, Odisha – 2010
